

Satellite Microwave

Hey dude

Not the one that cooks your food

Not the one that makes a call

Not the active part; just the passive part

Long wavelengths, less energy

Analogies

Clean and dirty windows

Water at half the emissivity

Of a city

Not quite the superhero

But able to see through clouds

(Non precipitating of course)

Good thing oxygen is well mixed

For us to breath

And something about temperature

Contemplation

Of the not so obvious

Warm above cold

Just moist

Or raining?

Or snowing, hailing, or an unrelenting downpour?
